CURRICULUM VITAE

Asiimwe Emmanuel

Kampala, Uganda
Tel: +256 740372862
emmyimmanuelasiimwe@gmail.com
GitHub: Em-Asiimwe (Emma-Asiimwe)
LinkedIn: Emma(Emmy) Asiimwe | LinkedIn

PROFESSIONAL PROFILE

Highly motivated and research-oriented Computer Science finalist with strong interests in Cyber Security, Robotics and Software Engineering. Possesses practical experience in Python programming, machine learning model development, mobile application development, cloud deployment, and academic research.

Aspires to contribute to cutting-edge research in telecommunications, intelligent networks, network automation and AI-driven communication systems while pursuing a career at the intersection of networking, artificial intelligence and emerging technologies.

Highly adaptable, quick to learn and possess indispensable resilience in complex situations with strong leadership skills.

PERSONAL INFORMATION

Full Name : Asiimwe Emmanuel

Nationality : Ugandan

Birth Date : 14th June 2002

Gender : Male

Marital Status : Single

Languages:

- English (Fluent)
- Luganda (Native)
- Runyankore (Conversational)

CAREER OBJECTIVE

To build a solid career in Cyber Security with advanced software engineering by contributing to innovative research projects and developing solutions that address real-world technological challenges. Seeking opportunities that provide exposure to network systems, wireless communications, machine learning applications, robotics, and embedded systems.

EDUCATION

Institution	Award	Time Frame
Makerere University	Bachelor of Science in Computer Science	**2023 – 2027**
Mengo Secondary School	Uganda Advanced Certificate of Education	**2020 – 2022**
Mengo Secondary School	Uganda Certificate of Education	**2016 – 2019**

RESEARCH EXPERIENCE

- **A Privacy-Preserving Semantic Data Warehouse for Decentralized Drone Swarms: Simulating D-AVAP Telemetry and Federated Aggregation via Mobile-Edge Agents.**

Conducting research aimed at developing an encryption protocol and semantic data warehouse. Military Command & Control Dashboard

- **Multi-Strategy Sparse Learning for Voice Pathology Diagnosis with Knowledge Distillation**

Machine Learning Research Project

Conducting research aimed at improving the diagnosis of voice disorders using advanced machine learning methodologies.

TECHNICAL PROJECTS

- **Swahara Platform**

This entailed tracking the local agreements made and ensuring that they are honored with blockchain integration, This was used for the advanced programming presentations, contributed on both the frontend and Backend of these modules.

- **Biiteek Sabs Project**

Contributed to the development of the user interface of the rent management system with solid client based feedback and interaction.

- **Intelligent Voice Pathology Detection System**

Designed and implemented machine learning models capable of classifying voice disorders based on speech signal characteristics.

- **Notes Taking and Banking System Applications**

These were to contribute to my app development and Software Construction skills,Developed a cross-platform note management application using Flutter.

INDUSTRIAL EXPERIENCE

Software Development Intern

Biiteek
2025 I June - September

Responsibilities

- Software development support.
- Application testing and debugging.
- Documentation preparation.
- Technical problem solving.
- Team collaboration.
- Enterprise Business

Achievements

- Contributed to software development activities.
- Strengthened practical programming skills.
- Participated in project implementation discussions.
- Demonstrated initiative and technical adaptability.

TECHNICAL SKILLS

Programming Languages

Advanced

- Python
- C
- SQL

Intermediate

- Java

Basic

- C++
- Dart

Software Development

- Flutter
- Mobile Application Development

- Object-Oriented Programming
- REST APIs
- System Design

LEADERSHIP AND TEAMWORK

Academic Collaboration

- Worked effectively in project teams throughout undergraduate studies.
- Assisted fellow students in technical coursework and project implementation.
- Participated in collaborative software development activities.

Mentorship

- Supported peers in understanding technical concepts related to programming and compiler design.
- Shared project development knowledge and implementation strategies.

RESEARCH INTERESTS

My research interests include:

- Software Engineering
- Artificial Intelligence
- Machine Learning
- Intelligent Network Management
- Internet of Things (IoT)
- Software Defined Networking
- Cybersecurity

ACHIEVEMENTS

- National Science Week 2026 Delegates for the College of Computing and Information Sciences.
- Developed multiple academic software projects.
- Conducted undergraduate research in machine learning.
- Successfully deployed machine learning applications using cloud platforms.
- Gained industrial exposure through internship experience.
- Demonstrated strong commitment to self-directed learning and technical growth.

PERSONAL ATTRIBUTES

- Analytical thinker
- Research-oriented
- Fast learner
- Problem solver
- Adaptable
- Team player
- Self-motivated
- Detail-oriented
- Technically curious
- Strong communication skills
